## A Note from Our Founder Sarah Gillet Couto

How are you supposed to measure success in the financial industry? For many executives, much of their happiness is tied to net gains, benchmarks, and other metrics that follow them home from the office.

We need to expand these measures to success to include meaningful engagement, fulfillment, even joy. I don't necessarily mean laughing more. Although I love what I do and I laugh a lot, the success I am referring to is about feeling at peace, aligned, and confident at work.

If you are tired of feeling disconnected, rushed, unhappy or unfulfilled, let's talk. Because I believe your life is better when you're free to pursue what matters the most to you.
